

TITOLCHIMICA

MICROSCOPY Line

Per la prima volta Titolchimica raccoglie in un elenco tutti i prodotti destinati al settore del laboratorio di microscopia messi a punto e venduti, in oltre trent'anni di attività, a marchio proprio e di terzi.

La linea si contraddistingue dall'uso sempre più importante dei flaconi in PET ambrato che garantiscono una migliore conservazione e protezione dalla luce dei coloranti pronti all'uso.

Oltre ai coloranti fondamentali, migliorati nella resa e nella stabilità, la linea si completa con un'ampia gamma di fissativi, solventi e reagenti necessari nelle varie tecniche di colorazione con, alla base, la garanzia di materie prime selezionate secondo metodi e parametri messi a punto nei nostri laboratori, secondo criteri di riferimento riconosciuti a livello internazionale.

Anche per questa tipologia di prodotti Titolchimica conferma la possibilità di produrre su misura formulazioni speciali, garantendo la stessa qualità in produzione e nei controlli, dei prodotti di serie.

For the first time Titolchimica collect in a list all the products destined to the sector of microscopy laboratory, developed and sold, in more than 30 years of activity, own brand and third parties.

The range is characterized by the use increasingly important of the PET amber bottles that guarantee a better storage and protection from the light of the dyes ready to use.

Besides the basic dyes, improved in their yield and stability, the range is completed with a big amount of fixatives, solvents and reagents necessary for the various staining procedures with, at its basis, the warranty to have raw materials according to methods and parameters developed in our laboratories, according to standard references internationally recognized.

Also for this kind of products Titolchimica confirms the possibility to produce special customized formulations, ensuring the same quality either in production or in the audits, of the series products.

TC 40500	ACETIC ACID 3 p/p
TC 40505	ACETIC ACID 5 p/p
TC 48500	ALCIAN BLUE 8GS 1% FOR MICROSCOPY
TC 45595	ALCOHOL ISO 9977/3
TC 45680	ALCOHOLIC FIXATIVE FORMALDEHYDE
TC 54216	B5 FIXATIVE
TC 23852	BLUING REAGENT
TC 50018	BOUIN FIXATIVE
TC 48600	BRILLIANT BLUE CRESIL
TC 85715	BUFFER SOLUTION PH 7,0 ACC. TO MCILVAINE
TC 85720	BUFFER SOLUTION PH 7,2 ACC. TO WEISE
TC 52653	BUFFERED ALCOHOLIC EOSIN Y 0,5%
TC 50600	CARAZZI HEMALUM
TC 50604	CARAZZI HEMALUM MODIFIED
TC 14852	CLEAR ACID SOLUTION
TC 48518	COTTON BLUE IN LACTOPHENOL
TC 42008	CUPRIC PICOFORMALIN ACC. TO HOLLANDE
TC 50960	DECALCIFYING ACID SOLUTION
TC 50951	DECALCIFYING AGENT FOR HISTOLOGICAL ANALYSIS
TC 54230	DECALCIFYING AND FIXATIVE KIT BOM 4x500 ml
TC 50986	DECALCIFYING FORMIC ACID RAPID
TC 51000	DELAFIELD HEMATOXYLIN
TC 52555	EOSIN YELLOWISH (0.5% ALCOHOL FOR COLOUR CYTOPLASM)
TC 52550	EOSIN YELLOWISH (1% WATER COLOUR FOR CYTOPLASM)
TC 52552	EOSIN YELLOWISH 0.2% alcoholic
TC 52522	EOSIN YELLOWISH 0.2% aqueous
TC 52520	EOSIN YELLOWISH 0.5% aqueous
TC 52650	EOSIN YELLOWISH 1% alcoholic
TC 57655	FIXATIVE SPRAY FOR CYTODIAGNOSIS
TC 55350	FLOXINE EOSINE HIDROALCOHOLIC SOLUTION
TC 45600	FORMALDEHYDE 10% (v/v) BUFFERED AT Ph 7,0 ACC. TO LILLIE
TC 45647	FORMALDEHYDE 4% PH 7,2-7,4
TC 4560C	FORMALDEHYDE ACCORDING TO CARSON
TC 56200	GIEMSA SOLUTION ACCORDING TO (BLUE EOSINE-BLUE METHYLENE)
TC 55401	GRAM-HUCKER KIT
TC 55400	GRAM NICOLLE KIT
TC 62200	HEMALUM acc.to MAYER
TC 55475	HISTO ALCOHOL B+ 70°
TC 55479	HISTO ALCOHOL B+ 95°
TC 55499	HISTO ALCOHOL B+ 99°
TC 66782	IMMERSION OIL
TC 93109	ISOPARAFFINIC SOLVENT
TC 70929	KIT CONGO RED
TC99802-3	KIT DIF- STAIN
